Central Gulf South Natives for Your Environment

Louisiana Growers is a wholesale native plant nursery tucked away in a longleaf pine grove in northern Tangipahoa Parish.

Large enough to offer a diverse selection of native and exotic plants, Louisiana Growers is small enough to allow customer contact with the owner, Rick Webb: native plant grower, enthusiast, and advocate for over thirty years.

Contact Susan for our contract-grow agreement when you need larger quantities and additional species.

*The wetland indicator status ratings for our plants is based on the US Army Corps of Engineers' 2016 Wetland Plant List for the Atlantic and Gulf Coastal Plain region. This is what they mean:

OBL: Occurs almost always under natural conditions in wetlands. Found in standing water or seasonally saturated soils near the surface (Obligate Wetland)

FACW: Usually occurs in wetlands, but occasionally found in non-wetlands (Facultative Wetland)

FAC: Equally likely to occur in wetlands or non-wetlands (Facultative)

FACU: Usually occurs in non-wetlands, but occasionally found in wetlands. Predominately occur in drier sites or where water rarely saturates the soil (Facultative Upland)

UPL: Almost never occurs in wetlands (Upland)
